PROFESSIONAL SUMMARY

Computer Science sophomore with hands-on experience in database management, full-stack development, and systems administration. Currently building TableTap, a POS side project for Ethiopian restaurants, alongside two years of volunteer database work. Eager to grow in data-oriented and software engineering roles.

PROFESSIONAL EXPERIENCE

Volunteer – Database Management & Digitization | *Ashagari Charitable Organization* | Addis Ababa, Ethiopia • June 2021 – May 2023

- Led the end-to-end digitization of all client records over two years, maintaining an accurate and accessible organizational database.
- Built custom scripts to automate repetitive database tasks, reducing manual data entry time.
- Integrated and maintained a cloud storage system enabling organization-wide access to client files and records.
- Independently managed complex data workflows, demonstrating strong ownership and problem-solving initiative.
- Contributed to the organization's mission of empowering youth and women in Addis Ababa.

PROJECTS

TableTap — Co-founder | table-tap.tech • 2025 – Present

A POS system for Ethiopian restaurants, QR ordering, kitchen display, Telebirr payments, and real-time analytics. Pre-launch.

- Building the full-stack platform using Next.js and Django, including a real-time kitchen display, QR ordering flow, and analytics dashboard.
- Integrated Telebirr payments and built a bilingual (English & Amharic) menu management system.
- Handling both the technical build and early customer discovery, pitching to restaurants and collecting feedback ahead of launch.

Web E-Commerce Project — [GitHub](#)

A full-featured e-commerce website with product search, ordering, and reviews, plus a separate admin panel. Built as a school assignment.

- Developed a multi-page PHP/HTML/CSS e-commerce site with product browsing, a shopping cart, and a user review system.
- Built a dedicated admin panel for product and order management, applying MVC principles and structured data handling.

Linux Home Server

- Built a fully functional Linux-based home server using a repurposed desktop, configured for 24/7 operation.
- Managed server networking, static IP setup, and system optimization; self-hosting services and learning infrastructure hands-on.

SKILLS

Technical: Python (Django), Next.js, C++, Java, Docker, Git, Linux

Soft Skills: Collaboration, Communication, Strong Work Ethic, Adaptability, Problem Solving

EDUCATION

Bachelor of Science, Computer Science (Currently Enrolled)
Addis Ababa University | Addis Ababa, Ethiopia | Expected Graduation: June 2027

High School Diploma
Fountain of Knowledge School | Addis Ababa, Ethiopia | Graduated: July 2023
